

## Bed Bases

**NERVAL CORPORATION** Care & Maintenance documents provide guidelines on how to care for your NERVAL product. Failure to comply with NERVAL's Care & Maintenance documents voids product warranty.

### ***Metal Bed Bases***

NERVAL metal bed bases are constructed with powder coated steel components. Avoid cleaning with abrasive sponges or brushes, as this can damage the powder coated finish, and if the powder coated finish is worn off, the exposed steel may be susceptible to rust upon prolonged exposure to water or a humid environment. Ensure the metal bed base is kept dry. To clean, dust using a dry duster. If a cleaner must be used, use a gentle cleaner and a soft cloth dampened with warm water, and immediately after cleaning, thoroughly dry the bed base.

### ***Wooden Bed Bases***

NERVAL wooden bed bases are constructed with TFL finished MDF, and powder coated steel components. Though the TFL is water resistant, any damage to the TFL surface can expose the MDF to water absorption. Ensure the wooden bed base is kept dry. To clean, dust using a dry duster. If a cleaner must be used, use a gentle cleaner and a soft cloth dampened with warm water, and immediately after cleaning, thoroughly dry the bed base.

Always remove bed bases before shampooing carpet.
