The Nerval 9120 Hinge series are a great solution for glass to glass applications. They can be used with 2 types of cutouts (see attached spec) and can hold a maximum door with of 36". All frameless shower door products have been designed and developed to meet industry norms and safety requirements. However, before installing make sure your enclosure adheres to listed guidelines on glass weight and size restrictions. Consult local building code prior to installation and always use safety glass.
