

Ironing Boards

NERVAL CORPORATION Care & Maintenance documents provide guidelines on how to care for your NERVAL product. Failure to comply with NERVAL's Care & Maintenance documents voids product warranty.

Ironing Boards

A low quality ironing board is not good for your guest experience. NERVAL ironing boards are sturdy and reliable. To maintain your ironing board, the following is recommended:

- Clean your iron cover periodically. This will prevent dust and dirt transferring from the cover to your guests' clothes.
- Ensure the cover is dried completely before reattaching it. Trapped moisture can lead to mold and odours.
- Dust the base of the ironing board regularly.

Please contact your Nerval representative if you have additional questions or concerns.
