

Housekeeping Carts

NERVAL CORPORATION Care & Maintenance documents provide guidelines on how to care for your NERVAL product. Failure to comply with NERVAL's Care & Maintenance documents voids product warranty.

Housekeeping Carts

NERVAL housekeeping carts are constructed with aluminum frames, with adjustable and removable shelves and partitions. To clean, wipe down the carts periodically using general purpose cleaner and a microfibre cloth to trap and remove bacteria on the surface. Remove shelves and partitions in order to properly clean all corners and crevices. Make sure to clean the handles and other high touch areas often to prevent the spread of germs.

Laundry carts have a removable canvas bag, which makes the bag easy to wash. Laundry cart bags collect moisture over time, making them habitable places for mold, creating odours. Laundry cart bags should be regularly washed with hot/warm water, using a heavy duty detergent. After washing, allow the bag to dry completely before using it.

Please contact your Nerval representative if you have additional questions or concerns.
